

Maths Party

KS2: Money, money, money

Involve your child when buying and paying for items at the shops. Ask them to help you work out the best value for items by looking at the price tags and the quantities in packets etc. See if your child can work out what change you will get e.g. from a £5 or £10 note.

Take a look at the website below for more ideas and advice on how to help your child with maths.
